Are You Part of the Solution?

4 Signs of Sustainability at Your Grocery Store.

Manomet's GREEN Grocery List

Which practices can you find at your grocery store?

- The store composts food waste (ask a produce section employee)
- Night curtains for open reach-in style coolers (look for the handle above as they are likely to not be pulled down during business hours)
- Seafood display uses no ice but uses refrigerated display case
- LED lighting in refrigerators and freezers
